

For Immediate Release

New DW® 5MP Universal HD over Coax® Video Surveillance Products Now Shipping

The complete solution includes cameras, recorders and new remote management software to bring it all together.

DW®'s Complete HD over Coax™ Surveillance Solution

Cerritos, CA (June 3, 2019) – [DW® Complete Surveillance Solutions](#), the industry leader in digital recorders, surveillance cameras and related management software, announces the release of our new 5MP complete Universal HD over Coax® (UHDoC) surveillance solution. The new products include 5MP Star-Light Plus™ color in ultra-low-light UHDoC cameras, VMAX® A1 Plus™ UHDoC digital video recorders (DVR) and C3™ CMS, a brand new remote management software for DW's VMAX® A1 Plus™ DVRs and VMAX® IP Plus™ NVRs. The complete solution and individual products are ideal for users looking to discover new ROI by utilizing their existing coaxial infrastructure and upgrade to HD multi-megapixel resolution image quality.

Digital Watchdog Press Release

5MP Star-Light Plus™ Universal HD over Coax® cameras offer image enhancement features such as Star-Light Plus™ ultra-low-light technology for clear color or monochromatic images in almost zero light, true WDR and Smart DNR™ 3D digital noise reduction. The new cameras come in a variety of housing options, including new vandal ball cameras with true 90° field-of-view angles and zero IR distortion. All DW® Universal HD over Coax® cameras are engineered to work with our new VMAX® A1 Plus™ Universal HD over Coax® DVRs to easily get new ROI from existing coaxial infrastructure.

A VMAX® A1 Plus™ DVR can record cameras with up to 5MP resolution, including 1080p video at real-time 30fps. The DVRs simplify camera installation and adjustment through Up the Coax (UTC) remote configuration, available with all compatible cameras. The DVR's powerful capabilities are easily managed with an intuitive and simple-to-operate User Interface. Unique and dynamic features include P2P Pathfinder™ remote connection, camera event group recording, auto channel signal swap and live system monitoring. The VMAX® A1 Plus™ DVRs can be controlled remotely via a built-in web server, our new powerful and easy-to-use C₃™ CMS software, DW® mobile apps including the new state-of-the-art DW Mobile Plus™ app for iOS® and Android® smartphones or tablets, as well as on Apple TV with the DW Site Viewer™ app. The VMAX® A1 Plus™ models are available with up to 20TB of storage.

The C₃™ client and event server make up a remote management software suite for DW® VMAX® A1 Plus™ and VMAX® IP Plus™ embedded recording solutions. It provides users a powerful and easy-to-use new way to monitor a system from anywhere. Full-featured yet lightweight, the software delivers simultaneous live views and playback of recorded video. The C₃™ client and versatile event management software support hundreds of devices simultaneously. C₃™ CMS provides actionable information in real-time, helping users to make more informative decisions as events happen.

Digital Watchdog Press Release

“HD video over coaxial infrastructure is one of the fastest growing segments in the video surveillance industry,” said Mark Espenschied, Director of Marketing, DW®. “DW® makes it easy to breathe new life into that investment in cabling by swapping recorders and cameras for an instant HD upgrade. Our development of the C₃™ software has made it possible for us to offer powerful remote management features at no charge for which users would expect to pay a premium.”
